The event is organized since 2009 by the company Elite Consulting SAC in alliance with the Ibero-American Mining Institute, promoting the development of engineering, new technologies, presenting the current and future scenario, through speakers from government companies, researchers and investors. Peru continues to be a great opportunity for the development of new projects in a territory where the Andes mountain range is located, reaching up to 6,768 meters above sea level, which requires ingenuity, creativity and the will to build infrastructure projects and a great experience to develop underground mines.

On this occasion, the congress will present new experiences in tunnels, highways and the cases in Peru of large surface mines that will soon become underground.

¿Who Attend?

- 35% Construction companies
- 35% Mining companies
- 10% Consultant
- 10% Government officials
- 5% Providers, manufacturers
- 5% institutions
